

# Retrospective Sprint 6:

Scrummaster: Svante Bennhage

Team effort: 56/56

## PROs:

- Group has worked exceptionally well even in absence of a MOPED. We finally understood that we can't without working together with other groups and borrow their MOPEDs when possible.
- We know how to work around solve most of the recurring problems with the MOPED.
- Realization of that recurring problems don't solve themselves.
- Great communication with other groups.
- Parallelised work even better than before.
- Great internal communication between group members.
- Group members have gained each other's trust.
- We work well with new challenges
- We believe in each other's capabilities and trust that each team member does their task well. This allowed everyone to focus on their task and eliminate unnecessary stress.
- We feel a collective pride after the demonstration
- Group has stayed optimistic and positive during the last sprint.

## CONS:

- Absence of a working MOPED.
- Since this was the last week, some unpredictable problems develops during the sprint that weren't noted in Trello. In addition, workload has escalated this week. As a result we have used Trello board poorly.
- Overestimated our abilities by believing the report will be done by today. This has caused some stress.

## Notes:

- Rest this weekend so we can complete everything, primarily the report.

*Kom inte för sent till det du vill komma i tid till.*

- Nalle Puh

## Poäng för extraarbete orsakat av bristfällig kommunikation med produktägaren

## Poäng per task

## Fördelning av arbetsresurser
