

# Meeting protocol eighth meeting - 20/10:

## Attendance:

All attending.

Secretary: Jakob Erlandsson  
Moderator: Svante Bennhage

## Recap from the demo yesterday and thoughts from the product owner:

Both Håkan and Kenneth were utterly impressed by everyone's performance yesterday. The demo went better than anyone could have anticipated. All they have to go on by now is what the demo showed. From friday next week they will start looking at our git repository to decide. It was very inspiring seeing people from companies around Lindholmen stop by and look at what we showed.

## Retrospective

See retrospective folder for summary.

## KPI:

It was hard to determine if the amount of people in each group was enough since this week was a kind of "all or nothing" sprint where we really wanted to get everything done almost no matter the work load.

## Other:

About 3 people need to proofread the report to relieve Anne and Jakob W of some of the work load. This is to make sure the report becomes as good as it can get. See Trello for further tasks for this week.
