Retrospective Sprint 1:

Scrummaster: Jakob Wall

Team effort: 47/50.

PROs:
- The group has gained a better understanding of the MOPEDs API.
- Cooperation between subgroups has worked well due to groups being in same location.
- We have finished the user stories we set out to do this week.

CONs:
- A difficult first sprint since we didn't have much to go on. A lot of the tasks have involved getting to know the system which lead to us not having a clear idea of how far into the sprint we had gotten close to the end of it.
- The estimations were a bit off.
- Unnecessarily large teams who worked towards very similar goals.
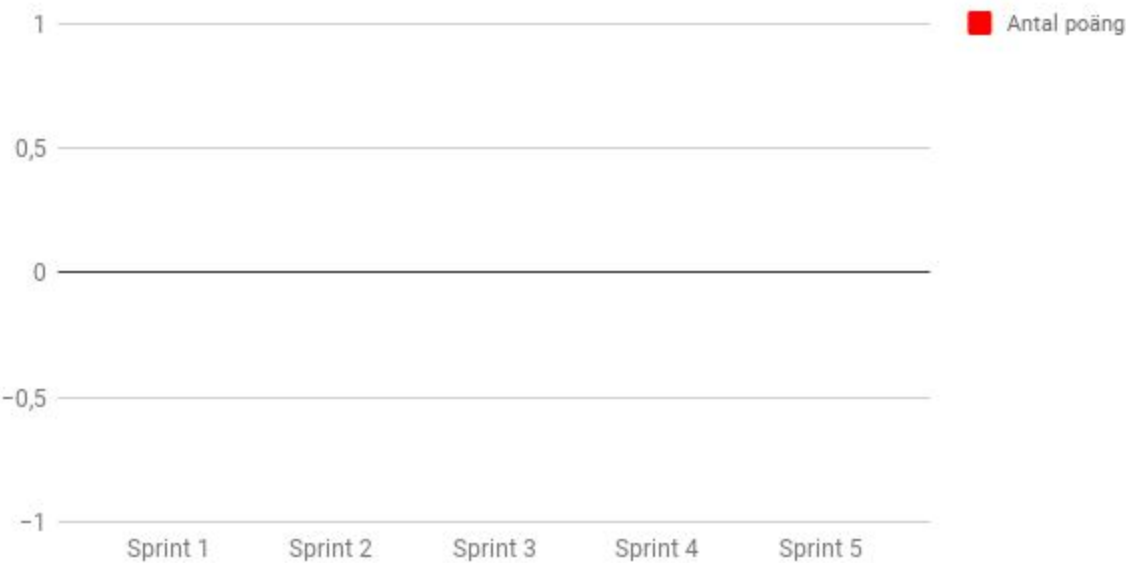

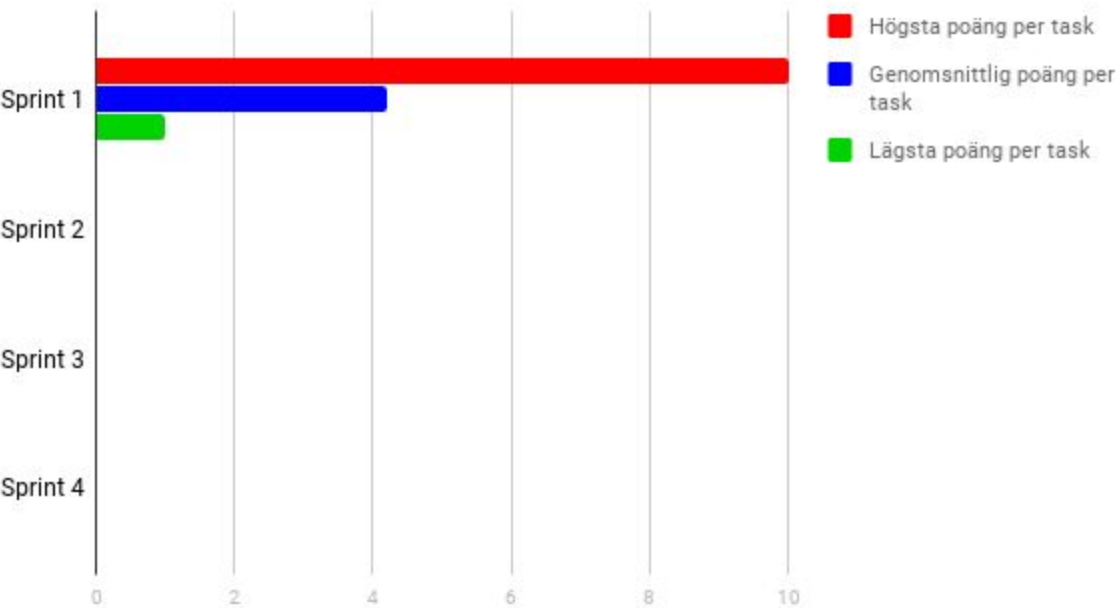

Our tasks should be about more than just code.

Notes:

- We need to implement a more parallel structure to our work and split the tasks into even smaller tasks to make this possible.
- We had a little bit of a slow start but most of that was getting to know the MOPED.
- When we split up into smaller groups we need to make sure everyone is included and everyone knows what's been done by each group.
- During the daily scrums we'll discuss what we've done and be open to questions from others.
- Make sure to update Trello while we're working to keep everyone up to date.

Below you will find KPI #1, #2, 3# in said order:

Poäng för extraarbete orsakat av bristfällig kommunikation med produktägaren

Poäng per task

Fördelning av arbesresurser
